

KLOPP CE

The Model CE counts, wraps and bags dollars, quarters, nickels, dimes, pennies and tokens one denomination at a time. It's portable. It does not sort.

Pour a large quantity of the same denomination of coins into the tray. Set the controls and insert a bank wrapper into the wrapping tube at the front of the CE. Turn the switch "ON", and in four seconds the wrapper is filled with the proper number of coins and the coin flow stops. Repeat the process until all coins are counted and wrapped. The CE will also count and bag coins instead of wrapping them. Just replace the wrapping tube with an optional bagging tube. The reset table meter will tell you the number of coins that have been counted into the bag. Includes (3) nylon wrapping tubes (.25, .10, .05) -or- (1) nylon wrapping tube and (1) all-purpose bagging tube.
