

## Klopp CM

The Model CM counts, wraps and bags dollars, quarters, nickels, dimes, pennies and tokens one denomination at a time. It's portable. It does not sort.

Pour a large quantity of the same denomination of coins into the tray. Set the controls and insert a bank wrapper into the wrapping tube at the front of the CM. Turn the crank, and in four seconds the wrapper is filled with the proper number of coins and the coin flow stops. Repeat the process until all coins are counted and wrapped. The CM will also count and bag coins instead of wrapping them. Just replace the wrapping tube with an optional bagging tube. The reset table meter will tell you the number of coins that have been counted into the bag. Includes (3) nylon wrapping tubes (.25, .10, .05) -or- (1) nylon wrapping tube and (1) all-purpose bagging tube.

The Portable CM is ideal for routes or when a limited budget is a consideration. The CM weighs only 14 lbs. while the also portable CE and KK weigh 22 lbs. All three have a balanced carrying handle for easy movement.

The CM is also recommended for counting wet coins/tokens from carwashes.
