

# CM18

The next generation of cash recycling technology.

# CM18

## Replace your cash drawer.

Whether you are accepting cash from customers or dispensing it back out, the CM18 handles it all.

### CASH OUT

When you need to pay out cash, the recycler automatically dispenses the stored currency that it took in earlier. You get cash-on-demand—when you need it.

### FITNESS SORTING

Unfit cash is separated so you don't have to worry about watching for bills with tears, holes, excessive wear and soiling. These notes can be rejected here or stored inside the safe for future handling.

### CASH IN

Place the currency into the machine and it counts, checks for counterfeits, sorts and stores the cash inside its vault. No more hand counting.

### MULTI-MEDIA TOUCH-SCREEN

Simple, touch-screen menus enable each user to be an expert from day one. Videos and on-board diagnostics guide you through the entire operation of the CM18.

## The next generation of cash recycling technology.

### Secure.

Keep your cash where it belongs—locked away in a UL 291, Level 1 vault that is rated for overnight storage of cash. No more open cash drawers with exposed cash.

### Fits the way you work.

Designed to fit in the same space as a typical cash drawer, the CM18 allows you to work like you always have but with no more manual counting and recounting of cash.

### Integrates with your system.

The CM18 operates with any software system and allows you to perform cash transactions with the maximum efficiency. Access to the CM18's special features, like bill counting, fitness sorting, unit configuration and diagnostics, are available directly on the touch-screen display.

### Robust and flexible.

The CM18, with 8 or 10 cassettes, can be configured to fit any type of cash environment. Built-in redundancy allows you to continue to operate even with the highest volume of cash transactions.
