

SCAN COIN 22 COIN SORTER

 **SCAN COIN**

SCAN COIN 22 COIN SORTER

The SCAN COIN 22 coin sorter is designed to provide a compact and economical coin sorting solution, equipped with SCAN COIN's unique sensor technology for outstanding accuracy and reliability.

Features of SC 22

- Counts and sorts up to 16 denominations of coin into 8 separate slots.
- Memory with denomination totals and grand total.
- Counts at speed up to 700 coins per minute. Typical 4-500 coins per minute depending on coin size.
- Uses a combined electronic and mechanical sorting mechanism for maximum accuracy.
- Easy to read 32-character alphanumeric LCD display for ease of operation.
- Built-in operating software will report totals, grand totals, date and time.
- Built-in RS232 interface allows the machine to be connected to a suitable equipped printer or computer.
- Tabletop design with a small footprint.
- A machine stand is available as an option to convert the machine into a freestanding unit.
- Automatic rejection of slugs, foreign or damaged coins.
- Programmable exact batch stops for bagging and / or wrapping in SCAN TUBE or gunshell wrappers.
- Four memory levels with two levels of sub totals and a grand total.
- Dual IDs with up to 13 characters for sub totals for maximum accuracy.
- Selectable unit count or value count.
