**X-1** is the world's most compact currency discriminator with a dedicated reject pocket. It is equipped with the most comprehensive, user-friendly functions necessary for tellers and cashiers in any cash handling environment. With an ergonomic design, color LCD, and intuitive interface, the X-1 not only provides tellers trouble-free operation and an efficient working environment, but also allows uninterrupted counting with the dedicated reject pocket. In addition to its high efficiency rating and superior user experience, the X-1 provides exacting security standards against the latest counterfeiting attempts through multi-detection technology, while still maintaining a low false alarm level and an excellent acceptance rate.

*3.5 Inch LCD display with full graphic user interface.*

## Features

- Multi-Currency Detection: Up to 5 currencies (USD Standard)
- Various Modes of Counting: Mix, Single, Face, Orient, Count etc.
- LCD Display: Color TFT LCD and full graphic UI notification
