LAUREL
LAUREL BANK MACHINES CO.,LTD.

Color Universal Design*

LAUREL has employed this concept when designing the colors of indicator lights and the colors and shapes of operation buttons.
The J-737 has received the color universal design certification mark from the non-profit Color Universal Design Organization.

* Color Universal Design
There is variation in the way individuals perceive colors, and many people find it difficult to see certain hues. Therefore, color universal design seeks to ensure that information is properly conveyed to all people regardless of their color perception. (http://www.cudo.jp)
