

Apollo

Single Pocket Currency Discriminator

Available
February
2018!

The Power of Zeus™ in a New Single Pocket Solution

Apollo™ packs all of the outstanding features of the original Cassida Pro Series Zeus™ Two-Pocket Discriminator into a single-pocket platform for an easy, one-to-one conversion from older competing single pocket units.

The @assida- ADVANTAGE

Better Technology

Apollo uses high definition and full color infrared scanning on both sides of every bill to ensure unsurpassed denomination recognition and counterfeit detection.

Advanced Security

Apollo uses much more accurate full-line UV scanning, unlike conventional discriminators which use only spot scanning.

Fewest Rejects

POWERED BY

Additional authentication by the proprietary Cassida M Algorithm, based on Intense and continuously updated technical research of millions of circulating bills.

Specifications:

Counting Speed 800/1000 Blis/Min.
Hopper capacity 500 Bills
Stacker capacity 200 ems
Blii Size Range 120 x 60 to 180x90 mm
Interface USE, RS-232, RJ-12, RJ-45
