

Apollo

# Single Pocket Currency Discriminator

Available  
February  
2018!

## The Power of Zeus™ in a New Single Pocket Solution

Apollo™ packs all of the outstanding features of the original Cassida Pro Series Zeus™ Two-Pocket Discriminator into a single-pocket platform for an easy, one-to-one conversion from older competing single pocket units.

Dual Clear and Start keys make Apollo ergonomically comfortable for both right and left handed users.

Convenient storage shelf provides space to store currency straps and pens for fast and easy access.

Automated, patented dust shield lowers currency dust levels for users.

High definition LCD screen with user-configurable color settings.

Keyboard has hot keys for faster mode changes and less scrolling.

Count new or worn bills smoothly without jamming.

## The @assida- ADVANTAGE

### Better Technology

Dual-Side IR Scanning

Apollo uses high definition and full color infrared scanning on both sides of every bill to ensure unsurpassed denomination recognition and counterfeit detection.

### Advanced Security

Full Line UV Scanning

Apollo uses much more accurate full-line UV scanning, unlike conventional discriminators which use only spot scanning.

### Fewest Rejects

POWERED BY

Additional authentication by the proprietary Cassida M Algorithm, based on Intense and continuously updated technical research of millions of circulating bills.

### Designed with the User in Mind

Created from the ground up for ease of use, the Apollo requires minimal training to achieve outstanding productivity. The Apollo's navigation and user interface is just that simple!

### Superior Counterfeit Detection
